Is Your Code Ready For Rails 3?

I. Authentication

- ✓ OmniAuth

- <https://github.com/intridea/omniauth>

- Devise

- <https://github.com/plataformatec/devise>

2. Access Control

- ✓ CanCan

- <https://github.com/ryanb/cancan>

- declarative_authorization

- https://github.com/stffn/declarative_authorization

3. Views/Page Style

- ✓ compass

- <https://github.com/chrisppstein/compass>

- haml

- <https://github.com/nex3/haml>

- sanitize

- <https://github.com/rgrove/sanitize>

4. Admin scaffold

- ✓ rails_admin
 - https://github.com/sferik/rails_admin
- web-app-theme
 - <https://github.com/andreferraro/web-app-theme>

5. Quick SNS

- ✓ **acts-as-taggable-on**
 - <https://github.com/mbleigh/acts-as-taggable-on>
- **has_friends-rails3**
 - https://github.com/rrouse/has_friends
- **acts_as_favable**
 - https://github.com/yorzi/acts_as_favable
- **thumbs_up**
 - https://github.com;brady8/thumbs_up
- ✓ **acts_as_commentable**
 - https://github.com/jackdempsey/acts_as_commentable
- **profanity_filter**
 - https://github.com/intridea/profanity_filter

6. Form builder & Uploading File

- ✓ simple_form
 - https://github.com/plataformatec/simple_form
- formtastic
 - <https://github.com/justinfrench/formtastic>
- formtastic_datepicker_inputs
 - https://github.com/demersus/formtastic_datepicker_inputs
- tiny_mce
 - https://github.com/kete/tiny_mce
- paperclip
 - <https://github.com/thoughtbot/paperclip>
- ✓ carrierwave
 - <https://github.com/jnicklas/carrierwave>

7. Searching

- ✓ meta_search
 - https://github.com/ernie/meta_search
- meta_where
 - https://github.com/ernie/meta_where
- thinking-sphinx
 - <https://github.com/freelancing-god/thinking-sphinx>
- ✓ acts_at_indexed
 - https://github.com/dougal/acts_as_indexed

8. Pagination

- ✓ kaminari

- <https://github.com/amatsuda/kaminari>

- kaminari_themes

- https://github.com/amatsuda/kaminari_themes

9. Background work

- ✓ delayed_job
 - https://github.com/collectiveidea/delayed_job
- resque
 - <https://github.com/defunkt/resque>

10. State Machine

- ✓ **workflow**

- <https://github.com/ryan-allen/workflow>

- **state_machine**

- https://github.com/pluginaweek/state_machine

III. Rack API framework

- ✓ grape
 - <https://github.com/intridea/grape>

I2. Memcached Client

- ✓ memcache-client
 - <https://github.com/mperham/memcache-client>
- dalli
 - <https://github.com/mperham/dalli>

I 3. Admin & Deployment

- ✓ pow (webserver)
 - <https://github.com/37signals/pow>
- ✓ god (monitor)
 - <https://github.com/mojombo/god>
- ✓ capistrano
 - <https://github.com/capistrano/capistrano>
- cap-recipes
 - <https://github.com/nesquena/cap-recipes>

I4. Cron job & Backup

✓ whenever

- <https://github.com/javan/whenever>

✓ backup

- <https://github.com/meskyanichi/backup>

I 5. Testing

- ✓ rspec-rails
 - <https://github.com/dchelimsky/rspec-rails>
- factory_girl_rails
 - https://github.com/thoughtbot/factory_girl_rails
- faker
 - <https://github.com/yyyc514/faker>
- watchr
 - <https://github.com/mynyml/watchr>
- autowatchr
 - <https://github.com/viking/autowatchr>
- database_cleaner
 - https://github.com/bmabey/database_cleaner
- mail_safe
 - https://github.com/myronmarston/mail_safe

I6. ToolKit

- ruby-debug (for real context debug)
 - <https://github.com/mark-moseley/ruby-debug>
- hirb
 - <https://github.com/cldwalker/hirb>
- cheat
 - <https://github.com/defunkt/cheat>
- rails-settings
 - <https://github.com/100hz/rails-settings>
